ABOUT

Hello! I'm an experienced Web Developer with a robust background in full-stack development, specializing in crafting high-quality, impactful applications. My expertise includes:

- **Front-End Development:** Proficient in HTML, CSS, JavaScript, and TypeScript, with extensive experience in modern frameworks such as React and Next.js. Skilled in state management using Redux and styling with CSS preprocessors like SCSS, as well as design frameworks including Bootstrap, MUI, and Tailwind CSS.

- **Back-End Development:** Competent in the MERN stack (MongoDB, Express, React, Node.js), enabling the creation of robust, end-to-end applications that seamlessly integrate client and server functionalities. This encompasses database design, RESTful API development, and server-side logic.

- **Cloud Services:** Foundational knowledge of AWS services, utilizing tools such as S3 for file storage, EC2 for scalable computing, and RDS for managed database solutions.

My commitment to continuous learning drives me to tackle real-world challenges with innovative software solutions. Currently, I am expanding my skill set by learning React Native, focusing on Expo for cross-platform mobile development.

EDUCATION

Under Graduate
2022 - 2026

Intermediate
2021 - 2022

Matriculation
2019 - 2020

- *Software engineering*

  GPA: 3.0
- *Pre - Engineering*

  Perc: 89%
- *Science*

  Perc: 84.24%

WORK (PROJECTS)

Sckivar(Agency site)

Designed and developed a modern, responsive website for a marketing agency using Next.js and Tailwind CSS. The site featured a sleek, professional layout with dynamic animations powered by Framer Motion, creating a captivating user experience. Key sections showcased the agency's services, client testimonials, and successful projects. Yarn was utilized for efficient project management, resulting in a fast, scalable, and visually striking online presence for the agency.

Wovies

A movie site was developed to fetch and display movie data using the TMDB API. State management was implemented with Redux for efficient data handling, and the application was styled using SCSS to ensure modular and reusable CSS.

	included features are movie database, detailed movie information pages, and user authentication capabilities.
Wizmo	A web application was developed to summarize articles based on URLs provided by users. The application utilizes Rapid API to fetch article data and summarize its content, enabling users to quickly determine whether they wish to read the full article. Redux was integrated for state management, efficiently handling user inputs and API responses.
Wizmo 2.0	Developed a web application that summarizes articles based on URLs provided by users. Utilizes Rapid API to fetch article data and summarize its content, enabling users to quickly determine whether they wish to read the full article. Integrated Redux for state management, efficiently handling user inputs and API responses.
Tellow	A cross-platform video calling application is being developed, featuring user authentication, video calling, multi-node functionality, and real-time authentication notifications. Clerk is being utilized for authentication, GetStream for the video calling feature, and Next.js for both backend functionality and the landing page of Tellow. The application is being built using Expo on top of React Native.

WORK EXPERIENCE

Interns Pakistan
Oct - 2022 - Dec - 2022

● *Web Designer*

I started as a beginner with basic **HTML/CSS**. Learned advanced **HTML**, **CSS**, **JavaScript**, **ES6** concepts, and basic **Git** workflows. Gained hands-on experience in writing clean, modern code and managing projects efficiently.

Liftup ai
Jan -2024 - Mar - 2024

● *Frontend Developer*

During my time at **LiftUp AI**, I gained invaluable hands-on experience with modern front-end technologies. I mastered advanced **CSS** techniques and developed a strong understanding of **SCSS**, enabling me to create modular and scalable styles. I also worked with **Tailwind CSS**, crafting responsive and visually appealing interfaces. My role involved building dynamic components with **React**, managing state efficiently using **Redux**, and integrating **APIs** to enhance application functionality. This internship sharpened my skills in creating seamless, user-focused web experiences.

Avialdo Solutions
Feb -2025 - Present

● *Next Js Developer*

At Avialdo Solutions, I develop dynamic applications using **Next.js**, manage **PostgreSQL** databases, and collaborate using tools like **Jira** and **Confluence**. This role has enhanced my full-stack development skills and understanding of product-focused environments.
